

Siraj Mohammed

FULL-STACK DEVELOPER | BACKEND-FOCUSED SOFTWARE ENGINEER

✉ sirajmd0202@gmail.com Siraj Mohammed sirajtech.work jaris_1_ Telegram : @jaris02

Full-stack engineer designing complete platforms across frontend, backend, databases, and deployment. Builds workflow-heavy systems with Next.js, React, TypeScript, Go, Python, FastAPI, Django, PostgreSQL, Supabase, Docker, and Nginx. Experienced translating academic, educational, developer-tooling, and location-data processes into maintainable software.

EXPERIENCE

Full-Stack Developer / Document Processing Gateway – Wollo University Oct. 2025 – Present

- Designed and built an end-to-end academic document processing and verification platform for Wollo University.
- Implemented authentication, RBAC, KYC, document verification, approval workflows, and administrative dashboards
- Built frontend, backend APIs, and PostgreSQL-backed business logic using Next.js, FastAPI, Supabase, and PostgreSQL.
- Improved system security and prepared the backend architecture for future migration to Go.
- The platform is scheduled for institutional deployment to support graduation document workflows.

Frontend Developer & DevOps/ Wisdom Pass Mar. 2025 –Apr. 2026

- Co-developed an AI-powered exam preparation platform for Ethiopian national exams including Exit Exam, GAT, and COC.
- Built responsive exam interfaces, mock exam workflows, and AI-assisted learning features using Next.js, React, Django, and FastAPI.
- Developed systems for question management, exam generation, analytics, and student progress tracking.

Go Backend Developer Intern / Gebeta Maps — Place Forge Jun. 2026 – Present

- Develop Go and PostgreSQL backend functionality for Place Forge, improving location-data review and verification workflows.
- Implement authentication, place-review APIs, and place-verification overview workflows using the Go standard library.
- Build PostgreSQL-backed operations for users, places, reviews, and verification data.
- Contribute to reusable internal Go package and logging libraries.

Full-Stack Developer & Extension Developer/ TabibX Dev Tool Oct. 2025 – Present

- Contributed to an AI-powered developer tool for repository tracking and workflow automation.
- Built backend services and repository analysis workflows using FastAPI, PostgreSQL, Docker, and Nginx.
- Worked on developer-facing features including repository summaries, changelog generation, and live project monitoring.

Desktop Application /Inventory & Store Management System Oct. 2025 – 2026

- Developed inventory and sales management systems for product tracking, invoicing, and operational reporting.
- Built desktop application and database workflows for transaction management and inventory monitoring.
- Implemented reporting, authentication, and workflow automation features to improve business operations by compliance with IFRS.

SKILLS

Programming Languages

Go • Python • TypeScript • JavaScript • SQL

Backend

Go • FastAPI • Node.js • Express.js • Django • REST APIs • Supabase

Frontend

Next.js • React • Tailwind CSS

Databases

PostgreSQL • MySQL • SQL Server • Prisma ORM

DevOps & Infrastructure

Docker • Nginx • Git • GitHub Actions • Vercel • Azure (learning)

AI-Assisted Development

- ChatGPT • Codex

EDUCATION

Bachelor of Science in Software Engineering

Wollo University 2026

Bachelor of Arts in Accounting and Finance

Unity University 2025

App Factory Academy Training

Wollo University 2025
