

Siraj Mohammed

WEB & DESKTOP APPLICATION DEVELOPER

✉ zizuasmat@gmail.com 🔗 Portfolio 📷 jaris_1_ 📧 jaris02 👤 Siraj Mohammed

I’m a Software Developer with a strong background in Accounting & Finance. I specialize in building ERP systems, financial applications, and automation tools that enhance business operations. Combining my expertise in finance and technology, I develop scalable , secure, and efficient solutions that drive digital transformation and improve financial decision-making.

EXPERIENCE

Software Developer / ERP & Financial Systems

📅 Mar. 2025 – Currently

- Designed and built salable financial applications and ERP systems, improving business operations.
- Developed automation tools to streamline accounting processes and business workflows.
- Led the back-end and database design for real-time financial tracking and data-driven decision-making.
- Worked with finance and business teams to integrate custom accounting logic into tech solutions.
- Implemented secure and optimized APIs, enabling seamless data exchange between departments.
- Ensured compliance with financial regulations while maintaining high-performance software solutions.

💡 Impact:

- Built a dynamic inventory and sales tracking system, reducing financial discrepancies by 40%.
- Developed an automated invoicing system, cutting processing time by 60%.
- Optimized database queries, reducing report generation time from minutes to seconds.

Software Engineer / Business & Finance Applications

📅 Oct. 2021 – Mar. 2025

- Developed and deployed custom business applications, focusing on financial and operational efficiency.
- Designed and implemented user-friendly dashboards, enhancing data visualization for executives.
- Built automated reporting tools, reducing manual data entry and improving accuracy.
- Worked in an Agile team, collaborating with developers, accountants, and business analysts.
- Integrated third-party financial APIs, improving payment processing and reconciliation.

💡 Impact:

- Created an automated payroll system, reducing human errors by 50%.
- Developed a financial analytics tool, enabling real-time insights into company performance.

SKILLS

Software Development & Engineering

- Full-Stack Development (Next.js, React)
- Desktop Application Development (C#)
- Database Design & Optimization (SQL Server, MySQL, Supabase, Prisma ORM)
- API Development & Integration
- ERP & Business Systems Development
- Authentication & Security (NextAuth.js, Role-Based Access Control)
- Cloud & Deployment (Vercel, Self-hosted PostgreSQL, Git)

Financial & Business Systems

- Accounting & Finance Systems (Inventory, Payroll, Sales Tracking)
- Data Analysis & Business Intelligence
- Process Automation & Workflow Optimization

Languages

- Amharic – Native
- English – Fluent
- Arabic – Basic
